	DESIRED MANAGEMENT OUTCOMES (from Symposium 1)										
DESIRED BEHAVIOR BY INDIVIDUALS (I) & COLLECTIVES (C)	Minimal harm to Society (fewer deaths & injuries, minimal social and economic disruption, other)	Minimal damage/loss to built environment (residential,	commercial, infrastructure, other)	Protection and restoration of natural floodplain functions and resources (habitat, filtration, buffers, recreation, biomass,, other)	seholds, nation	Proper apportionment of costs					
(add to list as needed)	Minimal harm to Society (f deaths & injuries, minimal social and economic disruption, other)	Proposed develop-ment	Existing develop-	Protection an natural flood; resources (ha buffers, recre other)	Resilient households, communities, nation	Proper appor					
Buy and keep flood insurance (I)											
Use setbacks from waterways, levees, etc. (C)											
Prepare household for flood disaster (I)											
Preserve floodplain open space (parks, conservation easements, etc.) (C)											
Adopt & enforce building codes (C)											
Operate & maintain dams & levees (C)											
Restore natural floodplains & coasts (C)											
Strategic retreat from coasts (C)											
Retrofit / floodproof house, business (I)											
Respond to warnings (I)											
Keep critical facilities out of hazard area (C)											
Being informed about risks and resources (I,C)											

Бтеакой 2	DESIRED BEHAVIOR (from morning Breakout session 1)															
WAYS TO MOTIVATE BEHAVIOR (add to list as needed)	Buy and keep flood insurance	Use setbacks from waterways, levees	Prepare household for flood disaster	Preserve floodplain open space	Adopt & enforce building codes	Operate & maintain dams & levees	Restore natural floodplains & coasts	Retreat from riparian & coastal zones	Retrofit/floodproof house	Respond to warnings	Critical facilities out of hazard area	Being informed	Others (from morning breakout)
